

Pre-Engineered Canopies, Awnings and Walkways

Imagination becomes reality with rugged, durable designs from Structures Unlimited, Inc.

Cantilevered, Segmented Canopy Design

Pre-engineered structures are ideal for linking buildings or providing weather protection. Structures Unlimited, Inc. is your single-source supplier for lightweight, low-maintenance structures. Diffuse, natural daylight can fill any area with glare-free, shadowless illumination.

Center Ridge Design Walkway

Segmented Skyroof™ with Custom-Tapered, Curved Structure

The structural integrity of Structures Unlimited, Inc. canopies, awnings and walkways is ideal in any climate ... stands up to desert sands, hurricane-force winds and arctic cold like no other material or system can.

Custom Ridge-Type Skyroof™

Unlike glass, natural rainfall actually keeps the panels clean and free of unsightly dirt and debris.

Complete Pre-Engineered Walkway Structure

Kalwall® translucent sandwich panels are secured to the superstructure to form a durable, rigid, long-lasting structure, which delivers balanced, glare-free daylighting. The unique, horizontal overlap eliminates leaks that plague other systems. Snow guards, gutter systems and downspouts are available.

The system's superior structural integrity stands up to hurricane-force winds, high snow loads and the most demanding code requirements. The Structures Unlimited, Inc., single-source responsibility saves time and site coordination.
